Over 30 Years Creating durable Electrical Solutions worldwide

Evolution, engineering and commitment since 1991

Since 1991, Famatel has been designing and manufacturing smart, reliable, and durable electrical solutions for professionals worldwide. From our origins in Barcelona to a global presence in over 80 countries, our growth is driven by **innovation, adaptability, and long-term vision**.

We invest in technology, automation, and design to lead change and provide added value — reaffirming our **commitment to quality, service, and continuous improvement**.

Our Vision

To be a global reference in the design and manufacturing of high-quality electrical solutions, recognized for our innovation, service excellence, and commitment to professional users.

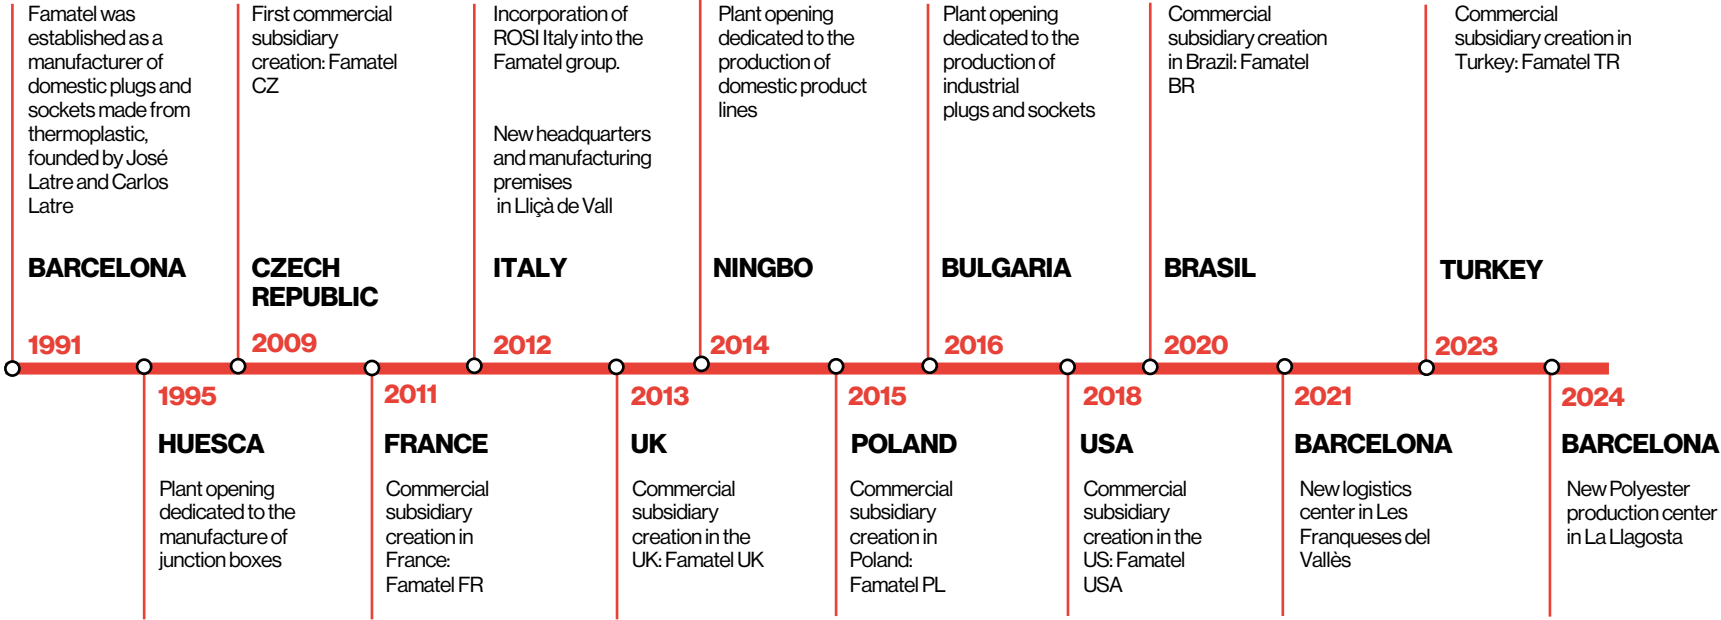

Our Mission

To develop and deliver smart, safe, and durable electrical products that simplify work, ensure reliability, and add value to our partners and clients worldwide — through technological expertise, industrial capacity, and a customer-oriented approach.

Over 30 Years Creating Electrical Solutions

Our Global Presence

Commercial subsidiaries

Present in over 80 countries

10 commercial subsidiaries

Famatel Spain – HQ & Logistics Center (Barcelona)

Famatel CZ – Czech Republic

Famatel FR – France

Famatel UK – United Kingdom

Famatel PL – Poland

Famatel USA – United States

Famatel BR – Brazil

Famatel TR – Turkey

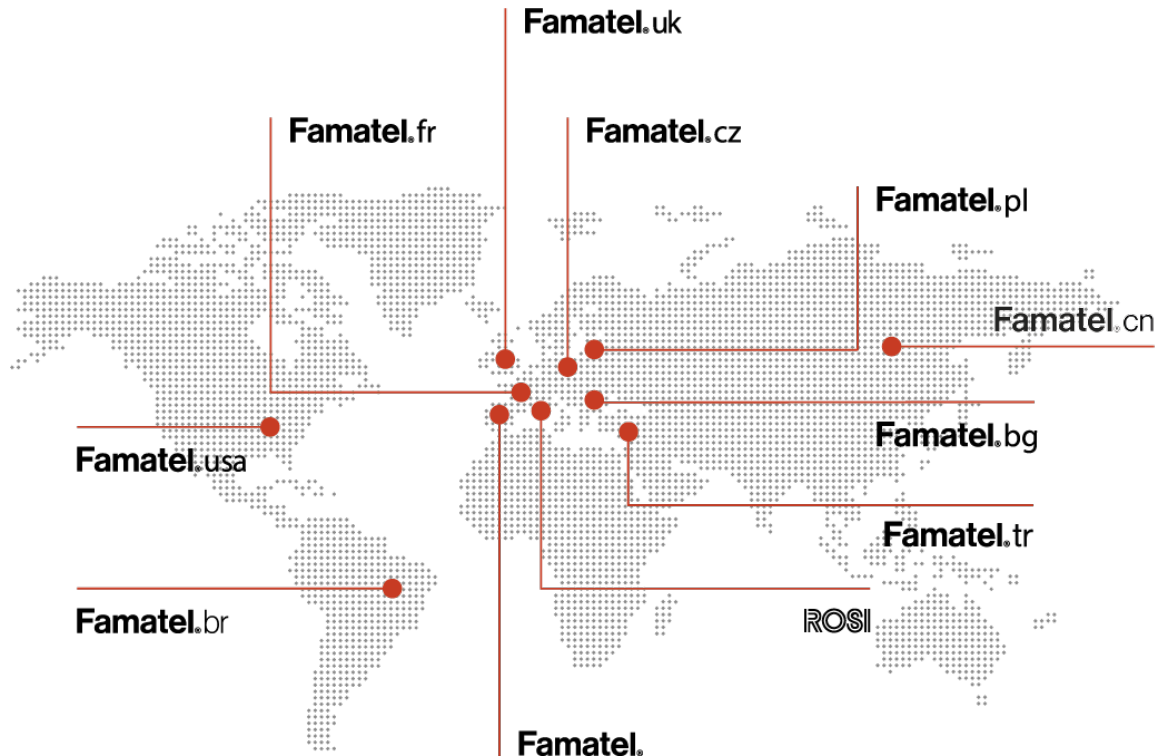

5 production centers | 1 logistics hub

Spain: Lliçà de Vall, La Llagosta, Huesca, Les Franqueses

China: Ningbo

Bulgaria: Plovdiv

Brasil: Sorocaba

Our Purpose, Beyond Numbers

The strength of an international industrial group

Famatel is more than an industrial group — we are a team of people driven by precision, responsibility and a shared vision:

to simplify electrical work and improve the everyday lives of those relying on our solutions.

In every product we design and every partnership we build, we bring together technical know-how and long-term thinking to create value for our clients, for our industry, and for the future.

Electrical solutions designed to empower professionals

Comprehensive product lines for every environment

At Famatel, we develop a complete range of electrical solutions engineered to meet the **highest standards of performance, safety and reliability.**

From industrial installations to residential spaces, our products are designed to simplify professional work and adapt to the needs of each market.

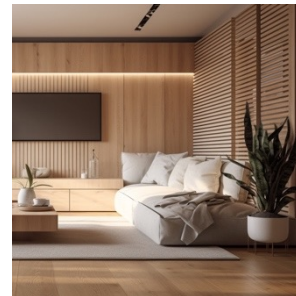

With over 30 years of manufacturing expertise, we provide our clients worldwide with smart, durable, and certified components that make a difference — every day, in every application.

Industrial

Residential

e-Mobility

Industrial Solutions

Famatel offers a complete range of industrial electrical components, engineered to ensure safety, durability and efficiency in the most demanding environments.

Our products are tailored for intensive professional use, providing robust solutions for industrial facilities, infrastructure and energy systems.

- **Industrial plugs and sockets**

High-performance connectors designed for secure and standardized power distribution.

- **Interlocked socket outlets**

Safety-integrated units with mechanical interlock, combining switching and protection in one device.

- **IP65 distribution enclosures**

Pre-wired, weatherproof enclosures designed for modular distribution systems for both indoor and outdoor environments.

- **IP66 Polyester enclosures**

Reinforced enclosures offering superior resistance to corrosion, UV exposure and harsh industrial conditions.

Industrial

Engineered to meet international standards, Famatel's industrial range is the trusted choice of professionals who demand safety, endurance and performance.

SpeedPRO Series

Acquacombi Series

Stone Series

Residential Solutions

Famatel offers a wide range of residential products designed to ensure safety, functionality and ease of installation in households, buildings and small commercial environments.

Our solutions are ideal for residential projects, refurbishments and basic electrical infrastructure, meeting both technical requirements and user expectations.

- **Domestic plugs and sockets:**

Thermoplastic components for everyday use, combining safety and modern design.

- **Junction boxes**

Resistant and versatile solutions for protecting and organizing residential wiring, IP55- IP65 range.

- **IP40 Distribution enclosures**

Easy-to-install enclosures for residential power distribution, available in multiple sizes and configurations.

- **Multiple socket outlets**

Ready-to-use, safe and durable power extensions for residential & soft commercial use.

Residential

All Famatel residential products are developed under strict quality standards, ensuring reliable installation meeting the needs of today's households.

New adaptors

e-Mobility

A new generation of chargers

Famatel, through its brand e3lectric, offers innovative and reliable solutions for electric vehicle charging, developed to support the growing demand for sustainable and smart mobility. Focused on performance, safety and intuitive installation, the e3lectric range is designed for both residential and semi-public use.

- **Wallbox chargers**

Compact, robust and user-friendly EV chargers with advanced connectivity and control features.

- **Smart enclosures**

IP-rated enclosures adapted for EV applications, ensuring reliable protection and integration.

- **Integrated systems**

Complete solutions that combine functionality, durability and design — making the transition to electric mobility easier and more efficient.

e-Mobility

**e3lectric represents
Famatel's vision for the
future of energy:
accessible, intelligent and
ready for tomorrow.**

Engineered to connect. Built to last

At Famatel, we design and manufacture electrical solutions that combine innovation, durability and precision.

Each product is developed to simplify the work of professionals, ensure safe installations and adapt to the needs of a constantly evolving market.

Because when a connection is well made, everything works better — today and tomorrow.

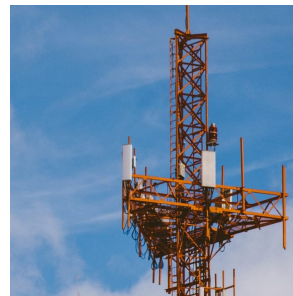

Construction

Reliable electrical solutions for temporary installations and demanding environments

Electrical systems on construction sites demand speed, durability and protection. Our solutions are built for quick installation and reliable performance, even in harsh outdoor conditions — ensuring safe and efficient power distribution throughout the project.

Telecommunications

Telecom infrastructure requires compact, weatherproof and reliable electrical systems that can operate continuously.

Our solutions provide secure connections and protection for sensitive equipment, supporting uninterrupted service in both indoor and outdoor environments — from data centres to remote towers.

Photovoltaics

Electrical components in photovoltaic systems must ensure safety, continuity and resistance to outdoor exposure.

Our enclosures, junction boxes and industrial connectors are designed to support reliable energy distribution in solar installations — combining ease of installation with long-term durability under demanding environmental conditions.

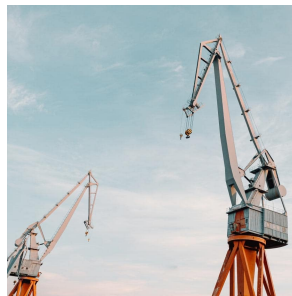

Engineered to connect. Built to last

At Famatel, we design and manufacture electrical solutions that combine innovation, durability and precision.

Each product is developed to simplify the work of professionals, ensure safe installations and adapt to the needs of a constantly evolving market.

Because when a connection is well made, everything works better — today and tomorrow.

Ports

Marine environments require electrical solutions with high resistance to humidity, salinity and mechanical stress.

Our components ensure safe and stable power distribution in port terminals, docks and shipyards, offering robust protection and reliable performance in areas exposed to extreme weather conditions and intensive use.

Agriculture

Rural and agricultural environments demand electrical systems that withstand humidity, dust and temperature variations.

Our solutions provide safe and durable power distribution for irrigation systems, machinery and storage facilities — ensuring efficiency and continuity in both indoor and outdoor agricultural operations.

Mining

Mining operations require electrical components capable of performing under extreme mechanical, thermal and environmental conditions.

Our enclosures, connectors and industrial distribution systems offer reinforced protection, operational safety and reliability — ensuring continuous performance in heavy-duty, high-risk environments.

Engineered to connect. Built to last

At Famatel, we design and manufacture electrical solutions that combine innovation, durability and precision.

Each product is developed to simplify the work of professionals, ensure safe installations and adapt to the needs of a constantly evolving market.

Because when a connection is well made, everything works better — today and tomorrow.

Gardens and Pools

Outdoor leisure areas require electrical solutions that combine safety, watertight protection and aesthetic integration.

Our products ensure reliable power supply for garden lighting, irrigation systems and pool equipment — offering easy installation and resistance to moisture, UV exposure and temperature changes.

Events

Temporary events demand flexible, safe and fast-to-deploy electrical solutions.

Our systems are ideal for powering stages, stands, lighting and support services — offering mobility, weather resistance and secure connections that adapt to changing layouts and time-sensitive setups.

Camping and Caravaning

Touristic and outdoor accommodation areas require compact, safe and weatherproof electrical systems.

Our solutions ensure reliable power distribution for caravans, mobile homes and service points — combining ease of use, IP-rated protection and compatibility with standardised connections for user safety and comfort.

Technical assurance through controlled testing environments

Every product undergoes an strict internal assessment to confirm its mechanical strength, electrical performance and resistance under real-world conditions.

Our dedicated laboratory enables us to validate quality in the early stages of the development process and maintain high standards throughout the production cycle.

In addition, we collaborate with internationally recognised organisations such as IMQ, SGS and VDE to certify compliance and reinforce product reliability and trust.

+200 Products tested and approved by international certification bodies

Corporate Certifications – Quality Management System

A quality system built around our customers

We operate an effective and efficient **Quality Management System based on ISO 9001**, designed to meet the expectations of today's market and place the customer at the centre of our priorities.

Through continuous improvement, trust in our team, and strong collaboration with partners, we ensure customer satisfaction by meeting and anticipating their needs.

ISO 9001

This framework reflects our commitment to quality, safety and sustainable growth

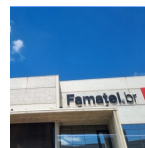

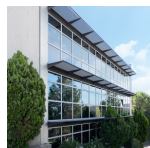

Production Facilities

Industrial capacity to support global demand

Our production model is based on full in-house manufacturing, allowing us to ensure product quality, traceability and continuous innovation. We operate more than **six strategically located production sites**, equipped with advanced injection moulding lines, automated systems, and dedicated assembly areas for both industrial and residential solutions

Each facility plays a key role in delivering flexibility, fast response and quality assurance to our global partners.
